Summary

Developer relations, documentation, and developer education leader with 8 years in open-source and AI developer tooling. Part of Streamlit's founding DevRel team (acquired by Snowflake for \$800M); grew from sole technical writer to Technical Product Manager of the Streamlit open-source library (40k+ GitHub stars, 1M+ monthly active developers, 90% of the Fortune 50), ranking among its top-10 all-time contributors and shipping production Python and TypeScript. Previously Coursera's first-ever project instructor, with 40+ hands-on courses and 290K+ enrollments. Builds documentation platforms, communities, and curricula that turn new users into experts.

Skills

Writing & documentation: technical writing, docs-as-code, information architecture, API reference, tutorials and guides, Markdown, MDX, Next.js, Sphinx, style guides, SEO

Code: Python, TypeScript, React, Streamlit, Git, GitHub, Jupyter, pandas, scikit-learn, TensorFlow, Keras

DevRel & community: community forums, Discord, Slack, GitHub support, conference talks, webinars, video, curriculum design, creator programs

Product: roadmaps, product specs, prototyping, user research, telemetry and analytics, go-to-market, competitive analysis

AI: GenAI product features, LLM-assisted authoring and coding workflows, documentation for AI agent platforms

Experience

Head of Documentation

Remote, India

AstroBee

June 2025 – May 2026

- Built docs.astrobee.ai from scratch for an AI agent platform and owned all of its content, including tutorials, guides, reference docs, and every demo asset the sales team pitched with.
- Drove growth alongside docs, delivering blog posts, SEO, landing pages, outbound copy, and growth experiments with performance reporting.

Technical Product Manager - Streamlit Open Source

Remote, India

Snowflake

Apr 2023 – Mar 2025

- Joined Snowflake through its acquisition of Streamlit; responsible for the Streamlit open-source library (40k+ GitHub stars, 1M+ monthly active developers, used by 90% of the Fortune 50), working with a team of 2 PMs and 10 engineers.
- Shipped features used by millions end to end as PM (spec, research, prototypes, launch), including [st.pills](#), [st.segmented_control](#), [st.feedback](#), [st.audio_input](#), chart [stacking](#) and [axis labels](#), video subtitles, and icon support across button elements.
- Personally designed, coded, and merged features and fixes in Streamlit core (Python, TypeScript, React), including st.expander icons, media autoplay, markdown text highlighting, and theme-aware maps; top-10 all-time [contributor](#) with dozens of [merged PRs](#).
- Defined Streamlit's long-term strategy and roadmap with fellow PMs and leadership, translating it into detailed requirements, wireframes, and prototypes.
- Partnered with marketing on go-to-market planning across pricing, packaging, positioning, competitive analysis, and sales enablement.
- Drove user research (interviews, surveys, usability studies) and turned insights into shipped product solutions.
- Represented Streamlit publicly, speaking at live events, appearing in videos, and writing blog posts.

Product Manager - Streamlit Documentation

Snowflake

Remote, India

Apr 2022 – Apr 2023

- Owned docs.streamlit.io end to end (getting started, tutorials, API reference, search, knowledge base, telemetry); top contributor to the [docs repo](#) with thousands of commits.
- Managed a team of technical writers and content strategists while owning the platform engineering; defined metrics and built telemetry data apps to track the impact of content and engineering work.
- Set the strategy for scaling docs with the product (features, components, Snowflake integration) and for meeting users beyond the site, in-product and while coding.

Developer Advocate

Streamlit

Remote, India

Apr 2021 – Apr 2022

- Part of Streamlit's founding DevRel team (second DevRel hire and sole technical writer), reporting to the co-founders and Head of DevRel; owned all [documentation](#), tutorials, and guides, and was among the team of 50 [acquired by Snowflake for \\$800 million](#).
- Ran the Streamlit community forum and supported users across GitHub and social media as the go-to resource for users in trouble, resolving the majority of their issues and serving as the bridge between our users and the product and engineering teams.
- Led development of a new documentation platform (with design and engineering) on Next.js, MDX, and Netlify, migrating all content off Sphinx and ReadTheDocs.
- Designed Streamlit's education program, enabling adoption across classrooms, boot camps, and internships.
- Built internal Streamlit apps and profiled telemetry to surface product and leadership insights; one app tracking cloud costs identified ~\$100k in savings.

Machine Learning and Data Science Instructor

Coursera

Remote, India

Dec 2019 – Apr 2021

- Coursera's first-ever project instructor and author of the first Guided Project on the platform; built curricula, instructional content, and video for 40+ Guided Projects on machine learning, deep learning, and data visualization, reaching 290K+ enrollments.
- Taught Plotly/Seaborn, scikit-learn, H2O AutoML, TensorFlow/Keras (NLP and computer vision), BERT, TensorFlow Serving, feature engineering, and ML pipelines, supporting thousands of learners in the discussion forums.
- Co-authored instructor onboarding docs and designed assessments for deeplearning.ai's TensorFlow
- Data and Deployment Specialization.

Skills Consultant

Coursera

Remote, India

Oct 2020 – Apr 2021

- Built a 100%-accurate skill-to-content source of truth powering Coursera's Skills Graph, auditing 400 courses against the skills taxonomy to ensure dataset quality for downstream ML needs.

Machine Learning Instructor

Rhyme.com (Acquired by Coursera)

Mountain View, CA

Aug 2018 – Oct 2020

- Created a portfolio of 20+ interactive, hands-on projects on machine learning, deep learning, and data science that led Coursera to acquire the company.

Education

Minerva University

BS in Physics and Computer Science

Aug 2015 – May 2019
